

BAGIT SYSTEM®
Bagit® Big Bag

The Bagit® Big Bag is a super heavy-duty, versatile sized, reusable bag. Its 65 gallon capacity makes it perfect for handling a wide variety of materials from glass to aluminum to news to yard debris, and most everything in between.

And it's tough. Heavy-duty coated 6.5 oz. polypropylene fabric with 1,200 hour U.V. treatment, and double stitching throughout, allows bag to be compacted (keep in mind that compacting may decrease bag life and bags are not recommended for glass collection if they are to be compacted).

Do you need a different size bag? We design reusable bags and liners for all types of uses and containers. For information on a bag constructed to your specifications, please call.

Features:

- Heavy-Duty drawcord and slide lock on top hem;
- Dual bottom lift handles, and top handle;
- Rated for 1,000 lb. filled weight;
- Easily cleaned or laundered (air dry only);
- Bag Dimensions: 21" x 21" x 40" tall;
- Total Bag Capacity: Approx. 65 US Gallons;
- Bag Color: White.
