

BAGIT SYSTEM®
Bagit® Reusable Leakproof Bag

The Bagit® *Reusable* Leakproof Bag is an innovative approach to handling the collection of used beverage containers. Available in two standard sizes, and in custom sizes with minimum order, the Bagit *Reusable* Leakproof Bag easily holds all the "dregs" you'd typically get in a 14 or 32 gallon receptacle, and it discharges its contents, hoses clean, and hangs to dry in seconds. The unique design has no inside folds or flaps, so it empties and cleans easily and completely. And, the heavy-duty construction eliminates the holes, tearing, and leaking common with single-use poly bags.

The 14 gallon model works perfectly with the Bagit Original single or double Rack. The larger model fits superbly as a reusable liner for standard 32 gallon round receptacles.

- heavy-duty, 6.2 oz. double coated woven polyethylene fabric (min. 10% recycled content);
- double layer fabric bottom stands up to tough use;
- color-coded, heavy-duty side release buckles for easy use;
- heavy-duty drawcord and slide lock in top hem, and dual top handles for easy handling/hanging;
- attractive mid-blue color fabric and handles;
- approximate 14 gallon capacity (approx. dimensions: 22" X 32" lay-flat, closed);
- approximate 32 gallon capacity (approx. dimensions: 36" X 34" lay-flat, closed);
- custom bag colors and sizes available (design fee applies, 500 unit minimum).
